Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

```
graph TD; A[Bulk buying due to early discount or no cost down buying can lead to huge inventory storage] --> D{Poor Inventory control in retail stores}; B[Over buying Inventory due to wrong forecasting] --> D; D --> C[When Inventory acquisition is more as compare to consumption/sale]; D --> E[Consolidation of delivery orders and standardize and regular supply may lead to bulk inventory storage];
```

Solution:

Based on the inventory management analysis we can manage how much inventory is required for selling the product based on which they can calculate the profit and loss.
